Education

Chulalongkorn University — Bangkok, TH
Bachelor of Engineering in Information and Communication Engineering — *Aug. 2025 –*

- ISE Academic Excellence Scholarship
- Spoken Language System Lab (SLS)
- Related courses: Data structure and algorithms, Discrete Structures

Experience

Lab member — Aug 2026 –
Spoken Language System Lab (SLS) Chulalongkorn University — *Bangkok, TH*

- Create diphone and triphone data to analyze
- Build a Grapheme-to-phoneme (G2P) model to convert written letters into the sounds of spoken language

Aerodynamics and Body Department, Engineer — Aug 2025 – Feb 2026
RapidAmente (Chulalongkorn Formula Student Club) — *Bangkok, TH*

- Create a cost report for a part of car's body
- Achieved 2nd in TSAE Auto Challenge

Flight Dynamics — Aug 2025
CUHAR (Chulalongkorn University High Attitude Research Club) — *Bangkok, TH*

- Learnt fundamental knowledge of flight dynamics
- Acquired knowledge on the design of rocket including nose cone, fins and body.
- Placed 3rd in 30K COTS Category

Internship, Automotive Engineer — June 2024 – July 2024
ThaiEV Co. Ltd — *Bangkok, TH*

- Gained knowledge of electric vehicle manufacturing by exploring the details of each component and their interconnections.
- Acquired hands-on experience in disassembling and assembling the Power Distribution Unit (PDU) and Motor Control Unit (MCU).
- Learned the concept, structure, and charging system of the battery system.

Projects

Grapheme-to-phoneme (G2P) model | *Python, Numpy, Pytorch* — Work in progress

- Build a g2p model using a grapheme thai dataset from huggingface
- Output the phoneme of the input text
- Require to convert the format of dataset into the Thai IPA

Biphone and Triphone Modeling | *Python, Numpy, Pandas* — Work in progress

- Converted phoneme-level transcriptions of dataset into biphone and triphone representations to model context-dependent speech sounds
- Generated the data used by the team to identify missing and under-represented phonetic units in the dataset
- Supported dataset improvement by helping reveal coverage gaps

N-Grams Language Models | *Python, Numpy*

- Build a language model using Brown NLTK Dataset
- Can predict a future words up to setted maximum length
- Contain perplexity to evaluate the performance of the model

Movie Recommendation System | *Python, Pandas, Scikit-learn*

- Developed a movie recommendation system using CSV datasets to recommend similar movies.
- Cleaned and preprocessed data using **Pandas**.
- Built a content-based similarity model using **scikit-learn**.

Pong | *C++, Raylib*

- Developed the classic Pong game using C++ and the Raylib graphics library.
- Applied object-oriented programming principles to model game objects and game logic.
- Implemented collision detection, bounce physics, and vector-based ball movement.

Technical Skills

Languages: Java, Python, C/C++, JavaScript, HTML/CSS,
Frameworks: React, Node.js, Material-UI
Developer Tools: Git, Google Colab, VS Code, Visual Studio, PyCharm
Libraries: pandas, NumPy, Matplotlib, scikit-learn, pytorch
CAD : Fusion 360, Solidwork

Certifications and Awards

Academic Excellence Scholarship – Chulalongkorn University Sep. 2026
Google Data Analytics Professional Certificate – Google Jan. 2026
Object-Oriented Data Structures in C++ – University of Illinois Urbana-Champaign Jan. 2026
Machine Learning in Production – DeepLearning.AI by Andrew Ng) Jan. 2026
Python for Machine Learning & Data Science Masterclass Aug. 2024
Beginning C++ Programming: From Beginner to Beyond – Frank J. Mitropoulos July 2022
Mastering 4 Critical Skills Using C++ July 2022
